Love (All) Your Neighbours

Delmar Epp
Associate Professor of Psychology
Canadian Mennonite University

March 1-3, 2019

Zion Mennonite Church
78 – 6th Avenue NE
Swift Current, SK

Overview:

Today's churches seek to build community in the face of increasing diversity, both within our congregations, and in our broader contexts. Yet there often exists an anxiety over opening our doors to change, and our culture promotes a need for protection and isolation from those outside our circles. Working from a social- psychological perspective, we will explore the origins of prejudice, the variation in people's prejudicial attitudes and behaviours, and the potential to transform relations among people who differ.
